About the Ice Age Trail

The Glacial Trail hike follows a section of the Ice Age National Scenic Trail, a federally funded, 1200-mile trail that winds its way across the State of Wisconsin. There are many beautiful sights to see as you hike along the unique hills and through the hollows that the trail traverses. The hills (moraines, kames & drumlins) and hollows (kettles) of the Kettle Moraine State Forest were formed over 10,000 years ago by two lobes of the continental ice sheet that flowed through the region and then subsequently melted. Visit the Henry Reuss Ice Age Visitor Center on Hwy 67 in Dundee to learn more about how the glaciers sculpted the area.
